

# M365 Security & Governances Audit

Using the power of Surveil, gain an understanding of the current state of your Microsoft security and governance – all with the recommended actions to drive long-term change.

## Key Information

Powerful insights courtesy of the Surveil platform.

Gain a clear understanding of your AD posture.

Identify and tackle licence wastage.

**Do you know how exposed your M365 estate is? Is your Microsoft investment secured? Are your users at risk?**

Many organisations struggle to regularly and accurately source the information required to effectively monitor the security of their Microsoft environment.

Using Surveil, our team will create a snapshot of your Microsoft 365's security and governance, posture reviewing current processes, configurations, and security gaps to highlight areas where optimisation is needed.

From MFA usage to administrator roles, our Microsoft 365 Environment Audit will tell you exactly what you need to do to maximise the security of your environment – and ensure both your IT estate and users are safe and sound.

## Outcomes

Review existing processes and configurations

Identify quick wins and long-term gains

Unparalleled insights using Surveil

Tailored reporting to encompass new solutions

Build upon results with recommended actions

Benefit from continuous improvement

**Duration**  
4-6 weeks

**Size**  
<= 5 000 users  
<= 2 Tenants

**Pricing**  
£5000+VAT

## Who is It For?

Organisations looking for a snapshot of their current Microsoft 365 environment, and who would benefit from being given AI-powered recommendations to effect long-term security improvements.

## What Happens?

The audit process is simple, quick to onboard, and includes the following:

### Stage One

Correct Surveil modules are enabled and information collection runs for two weeks.

### Stage Two

Consultants analyse information gathered and query and clarify with the customer.

### Stage Three

Findings are presented back to customer..
